COMMERCE
ARCHITECTURAL SYSTEMS

CENTRE GLAZED SYSTEM

Popular and flexible, the **COMMERCE** Centre Glazed System will meet all general wind load/span requirements.

Ideal for SHOPFRONT applications and available in 101.6mm and 150mm widths, the **COMMERCE** Centre Glazed System is suitable for glass thicknesses from 5mm up to 12.38mm.

ROBUST

The strong extruded profiles mean spans up to 3 metres can be easily achieved.

Easily fabricated with the use of straight cutting.

Labour costs are reduced with the use of a captive wedge .

POPULAR

CENTRE GLAZED SYSTEM

Self Draining sills and transom designs optimise weatherability and maximise water management.

The **COMMERCE Architectural Systems range has been designed with a modular theme in mind allowing for the incorporation of other **EZIAL** Framing suites, doors and windows and can be complimented with a range of louvres and infill panels.**

MODULAR

Subhead, subjams and subsills are recommended for use in exposed weather conditions.

Designed to Comply with Australian Standards AS2047.

FLEXIBLE
